# ALUMINIUM HYDROXIDE DRY

**HYDRAL 14 MX** 

**ATH** is obtained as a result of aluminum solutions decomposition in the course of Bayer process of alumina production and has a wide range of applications across industries due to its versatility.

#### **TECHNICAL DATA**

| Duous auties                   | Chemical Characteristics |               |                 |  |
|--------------------------------|--------------------------|---------------|-----------------|--|
| Properties                     | unit                     | Typical Value | Guarantee Value |  |
| AI(OH)3                        | %                        | 99,5 – 99,8   | 99,5 min        |  |
| SiO <sub>2</sub>               | %                        | 0,003 – 0,007 | 0,009 max       |  |
| Fe <sub>2</sub> O <sub>3</sub> | %                        | 0,006 - 0,010 | 0,012 max       |  |
| Na <sub>2</sub> O              | %                        | 0,12 - 0,18   | 0,25 max        |  |
| СаО                            | %                        | 0,008 – 0,010 | 0,015 max       |  |
| ZnO                            | %                        | 0,014 - 0,018 | 0,025 max       |  |
| Duonouting                     | Physical Characteristics |               |                 |  |
| Properties                     | unit                     | Typical Value | Guarantee Value |  |
| Moisture Content (105° C)      | %                        | 0,1 – 0,3     | 0,5 max         |  |
| LOI (1000° C)                  | %                        | 34,0 - 34,5   | 35,0 max        |  |
| Whiteness                      | %                        | 92 – 96       | 90 min          |  |
| Bulk density                   | kg/m³                    | 850 – 950     | 800 min         |  |
| Oil Absorption (Linseed oil)   | ml/100g                  | 15 – 20       | 25 max          |  |
| D10                            | μm                       | 1-3           | 5 max           |  |
| D50                            | μm                       | 7 – 15        | 17 max          |  |
| D90                            | μm                       | 20-30         | 35 max          |  |

The above values have been determined by the measuring methods and instruments of Alumina doo Zvornik.

## **APPLICATIONS**

For catalyst production, ceramic industry, refractory materials, cement industry, glass industry, filler in different areas etc.

## PACKAGING

We offer different types of packaging depending on your production needs:

| Type of packing        | Bulk (t)   | Big bags (kg) |                               | Small bags (kg) |                                 |
|------------------------|------------|---------------|-------------------------------|-----------------|---------------------------------|
| Logistic units         | Silo truck | Per pallet    | Big bags<br>- different types | Per pallet      | Small bags<br>- different types |
| Mass per logistic unit | 25         | 1000          |                               | 1000            | 25                              |

Specific type of packaging can be offered on demand.

## LOGISTICS

In order to meet your requirements in terms of delivery, we offer different logistic solutions. Our basic offer in terms of TRANSPORTATION is:

| Type of Transportation | Road transportation           | Rail transportation           |
|------------------------|-------------------------------|-------------------------------|
| Packaging              | In bulk or in bags on pallet. | In bulk or in bags on pallet. |

Other type of delivery on demands.
